### **DETAILED ACTION**

1. Claims 1-29 are pending in this application.

### ***Specification***

2. The specification is objected to because of the following:  
  
Pages 16 and 17, all figures should be listed with a brief description of each.  
  
This objection must be corrected.

### ***Claim Objection***

3. Claims 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 101***

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-13 and 18-29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The language of the claim raises a question as to whether the claim is directed merely to an abstract idea that is not tied to a technological art, environment or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 U.S.C. 101. Albeit a trivial example, claims 1-13 and 19-29 can be implemented with pencil and paper. While “Fuzzy-Now” in a related application (09/730,676) is claimed as an apparatus, in the instant application the reference is to “Fuzzy-Now” *function* which does not require an apparatus or implementation of a technological art. Further “modules” can be groupings of algorithm steps. The “means for” related to the instant specification accommodates a non technological art implementation.

### ***Conclusion***

6. The prior art of record and not relied upon is considered pertinent to applicant's disclosure.
